

Quality Service

Volunteers welcome you as soon as you arrive to the consultation.

They weigh and measure your baby, while making sure the consultation runs smoothly.

They ensure that it represents a real moment of exchange and relaxation by offering to you and your child a series of activities (conversation hours, playing sessions, reading sessions, psychomotor sessions, baby massage...).

Follow-up care for your child

Quality medical examinations to follow the healthy development of your child.

- According to a specific timeline, at important moments in your child's life :
 - 15 examinations from 0 to 3 years
 - 3 examinations from 4 to 6 years
- A doctor and an ONE medical social worker are at your service, by appointment, to examine and vaccinate your child, to weigh him/her, measure him/her, and observe his/her general development, also to listen to and answer your questions and give you advice...

Proposed timeline of examinations :

Unless there are any particular difficulties, your child will be seen at the age of	
	15 days
	1 month
	1,5 months
	2 months
	3 months
	4 months
	5 months
	6 - 8 months
	9 - 10 months
	12 - 13 months
	14 - 15 months
	18 months
	2 years
	2,5 years
	3 years
	4 years
	5 - 6 years

*public organization within the competition of the Federation Wallonia-Brussels

Preventive capacity

The examinations conducted at ONE clinics are only **PREVENTATIVE**. They do not replace a medical checkup by an attending physician.

In order to ensure that your child receives the best care when he/she is sick, schedule a meeting at ONE for prevention monitoring and at his/her attending physician's office (pediatrician or general practitioner).

Listening and providing support

The ONE medical social worker is available to :

- Accompany you in the discovery of your role as a parent and take on, with you, your different duties: breastfeeding, sleeping, safety, anger, and all stages of development...
- Meet you at your home, during an appointment taken at the clinic, and/or during clinic hours.
- Inform you about activities organized by the consultation :
 - Conversation hour (where mothers and children can come and interact with one another)
 - Playing sessions
 - Reading sessions
 - Psychomotor sessions
